

Remarks

By way of this Preliminary Amendment, claims 1-26 are pending. Claims 1-12 and 18-26 have been amended. These claim cancellations and amendments are being made solely for purposes of placing the claims in a format appropriate for U.S. prosecution. Applicants submit that the amendments do not change the scope of the claims as originally filed. Such amendments are therefore made to address formalities in the claim format and are not related to the patentability of the subject matter of the claims. No new matter was added by way of these claim amendments and additions.

Conclusion

Applicants believe that the subject matter of the pending claims is patentable and that the instant application should accordingly be allowed. If the Examiner believes that a conversation with Applicants' attorney would be helpful in expediting prosecution of this application, the Examiner is invited to call the undersigned attorney at (203) 812-6450.

Respectfully submitted,

Dated: September 22, 2004

Susan M. Pellegrino
Attorney for Applicants
Reg. No. 48,972

Amended Claims (Attorney Docket No. LeA 35 943)

1. (Currently amended) A method of screening for therapeutic agents useful in the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, like COPD, and asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising the steps of
 - i) contacting a test compound with a GHS polypeptide,
 - ii) detecting binding of said test compound to said GHS polypeptide.
2. (Currently amended) A method of screening for therapeutic agents useful in the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, like COPD, and asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising the steps of
 - i) determining the activity of a GHS polypeptide at a certain concentration of a test compound or in the absence of said test compound,
 - ii) determining the activity of said polypeptide at a different concentration of said test compound.
3. (Currently amended) A method of screening for therapeutic agents useful in the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, like COPD, and asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising the steps of
 - i) determining the activity of a GHS polypeptide at a certain concentration of a test compound,
 - ii) determining the activity of a GHS polypeptide at the presence of a compound known to be a regulator of a GHS polypeptide.

4. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the step of contacting is in or at the surface of a cell.
5. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the cell is in vitro.
6. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the step of contacting is in a cell-free system.
7. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the polypeptide is coupled to a detectable label.
8. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the compound is coupled to a detectable label.
9. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the test compound displaces a ligand which is first bound to the polypeptide.
10. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the polypeptide is attached to a solid support.
11. (Currently amended) The method of ~~any of claims~~ claim 1 to 3, wherein the compound is attached to a solid support.
12. (Currently amended) A method of screening for therapeutic agents useful in the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, like COPD, and asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising the steps of
 - i) contacting a test compound with a GHS polynucleotide,
 - ii) detecting binding of said test compound to said GHS polynucleotide.
13. (Original) The method of claim 12 wherein the nucleic acid molecule is RNA.

14. (Original) The method of claim 12 wherein the contacting step is in or at the surface of a cell.
15. (Original) The method of claim 12 wherein the contacting step is in a cell-free system.
16. (Original) The method of claim 12 wherein polynucleotide is coupled to a detectable label.
17. (Original) The method of claim 12 wherein the test compound is coupled to a detectable label.
18. (Currently amended) A method of diagnosing a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like~~ COPD, ~~and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising the steps of
 - i) determining the amount of a GHS polynucleotide in a sample taken from said mammal,
 - ii) determining the amount of GHS polynucleotide in healthy and/or diseased mammals.
19. (Currently amended) A pharmaceutical composition for the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like~~ COPD, ~~and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising a therapeutic agent which binds to a GHS polypeptide.
20. (Currently amended) A pharmaceutical composition for the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like~~ COPD, ~~and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising a therapeutic agent which regulates the activity of a GHS polypeptide.
21. (Currently amended) A pharmaceutical composition for the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like~~ COPD, ~~and~~ asthma,

hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising a therapeutic agent which regulates the activity of a GHS polypeptide, wherein said therapeutic agent is

- i) a small molecule,
- ii) an RNA molecule,
- iii) an antisense oligonucleotide,
- iv) a polypeptide,
- v) an antibody, or
- vi) a ribozyme.

22. (Currently amended) A pharmaceutical composition for the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like~~ COPD, ~~and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising a GHS polynucleotide.
23. (Currently amended) A pharmaceutical composition for the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like~~ COPD, ~~and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising a GHS polypeptide.
24. (Currently amended) ~~Use of regulators of a GHS for the preparation of a pharmaceutical composition~~ A method for the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like~~ COPD, ~~and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising administering to a mammal an effective amount of a regulator of GHS.
25. (Currently amended) Method for the preparation of a pharmaceutical composition useful for the treatment of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory

diseases, ~~like COPD, and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal comprising the steps of

- i) identifying a regulator of GHS,
- ii) determining whether said regulator ameliorates the symptoms of a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like COPD, and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation in a mammal; and
- iii) combining of said regulator with an acceptable pharmaceutical carrier.

26. (Currently amended) ~~Use of a regulator of GHS~~ A method for the regulation of GHS activity in a mammal having a disease ~~comprised in a group of diseases consisting of~~ selected from cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases, ~~like COPD, and~~ asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation comprising administering to a mammal an effective amount of a regulator of GHS.
